The following Address to the Indian Warriors who have been stopping for some time at the American Museum, was written by Mrs. Caroline M. Sawyer, after sev eral whits to and friendly conferences with these remnants of the proud Race which once possessed this Continent. The substance of these verses was communicated to the Red Men by an interpreter, and received by them with expressions of protound sensibility.

L'nes to the Endian Warriors. WE met !- 't is but a few short days Since I, with quickly throbbing breast, Came, with the curious crowd, to gaze On the Red Warriors of the West.

But not like them did I depart, With careless smile and thoughtless word; HE only knows, who reads the heart, What feelings in my breast were stirred.

The tale of all the cruel Past-The wrongs too monstrous to be told-Like a wild torrent strong and fast, In burning tide o'er Mem'ry rolled!

But peace, my heart !- I would not rouse One thought that now were best to sleep, Nor see across those noble brows The shades of dark Resentment creep!

I watch your stately tread, and meet The beaming smile, the glance of pride; And, frequent, through the busy street I come to linger by your side.

Your hands have oft been clasped in mine, Our eyes in Friendship's light have met; And many a speaking look and sign Have told-what I can ne'er forget!

You leave us-and I know 't is well!-For that far home I ne'er shall see: And men would smile were I to tell How sad WA-CAN-TAM's* heart will be!

E'en now, to think you must depart Far over mountain, stream and deep-WA-CAN-TAM has a woman's heart-A woman's heart-and she must weep!

Brothers, farewell!-the hour is near When you must go, and I must stay; But oh! how oft to God my prayer Will rise for you when far away!

Go to your homes !- there loved ones claim Your thoughts, your kindness and your care; Yet tell me-will WA-CAN-TAM's name Be ever spoken by you there?

Ay, go !- and blessings on you rest, Wherever you in life may roam; And may the hearts that love you best, With joyful shouts receive you home!

* A name conferred on Mrs. S. by the Indians—signifying One who holds converse with the Great Spirit.'

From the Providence Journal. The Comet. Mr. Editor: At a moment when the public curiosity is strongly excited by the appearance of an

unlooked for and very remarkable Comet, a word upon the subject will not be out of place. Six or seven days ago vague rumors from abroad by newspapers and otherwise, announced that a Comet was to be seen, and still more, that it was to be seen at mid-day near the Sun's disc. We very soon satisfied ourselves that the latter part of this report was unfounded, and concluded, perhaps

too hastily, the same of the former. On the evening of Sunday, the 5th instant, the weather being very clear, the attention of many persons was attracted to a long, slender and slightly curved beam of light in the western sky, which appearing in a very transparent atmosphere and pretty well defined, though not remarkably bright, could not be confounded with those diverging beams which in a hazy air are often seen in the west after sun-set. On the evening of Monday, the 6th, as the twilight began to fade away from a perfectly clear sky, the same slender beam of light re appeared with increased brightness. It was first observed by the writer at 7 o'clock. The beam commenced a little above the horizon, the ordinary exhalations not permitting it to be seen lower, at a point 10 or 15 degrees south of west, and with the aid of a common finder to a telescope could be traced 45 or 50 degrees of a great circle, making with the horizon toward the south an angle of about 35 degrees. The breadth at the lower point was about 2 degrees, or 4 times the diameter of the setting sun; it grew broader toward the upper end-not exceeding, however, about 2 degrees at

the upper was lost in vapor and exhalations which always exist in the lower strata of the atmosphere. There seems no reason to doubt that this beam of light is the tail of a comet. The body, or nucieus, if there be any, is probably too nearly in range of the sun to be seen. The direction of the tail would evidently pass near the sun's place, but whether north or south of it is not certain. are authorized, then, to speak of this new visiter as a Comet; and it is certainly the most remarka-

the widest place. At the hour mentioned it was

quite well defined, notwithstanding a strong twi-

light and the presence of the moon, seven days old.

It was observed till a little after 8 o'clock, when

the lower part had passed below the horizon, and

ble one which has been seen for at least a century. We have said that it was unlooked for. Since the commencement of the Christian Era, five or six hundred different comets, or at least different appearances of comets, have been noticed. Ot this number the orbits of about 140 have been computed. The orbits are nearly all of a parabolic form-that is, the path of the comet does not return into itself. When it has left our system, it leaves to return no more, unless its course should be disturbed by the attraction of some heavenly body and its orbit changed.

Three comets only are known to revolve in Ellipses, and to return at regular intervals. They

are the following: 1. Halley's, which has a period of about 76 years. It passed its peribelion or nearest approach to the sun on the 16th of November, 1835. It will not again return till the year 1911.

2. Encke's, which has a period of 3 1-3 years, or spring of 1842. Its next return will be in the

summer of 1845. 3. Biela's, which has a period of about 6 3-4 years, or more exactly, 2461 days. Its last return was in 1839. The next will be in 1846.

The first of these on its last appearance, though visible to the naked eye, was by no means conspicuous or impressive. Its appearance on some of its previous visits, is described as terrific and alarming in the highest degree. The two last named, Eacke's and Biela's, are so exceedingly faint that it requires telescopes of considerable

power to see them at all. The present comet is remarkable for the length of its luminous train. The only conspicuous comet within the last century, or since the great comet of 1744, was that of 1811, the tail of which was 23 degrees in length. It has been observed that those comets which approach very near to

the sun have their matter greatly diffused, thus producing long tails. On this principle, the present comet may be supposed to be near the sun. The following is given by Arago as the lengths of the tails of some of the most remarkable com-

ets which are upon record :-Comet of 1811, length 23 deg. " of 1689, length 68 deg. curved like a

Turkish sabre.

Comet of 1680, length 90 deg. " of 1769, length 97 deg.

Thus the comets of 1680 and 1769 might be in the horizon setting, whilst a portion of their tails would be in the zenith. Expressed in miles, the length of the former of these would be more than 96,000,000.

We, at first, entirely rejected the report that a

of glasses. Such testimonies have since been received as leave no reason to doubt that one or two days of last week the present comet was in such a position, and of such brightness, as to be seen at mid-day by the naked eye. This, though extremely rare, is not without precedent.

The Astronomer Lalande mentions one which was seen at the death of Demetrius, King of Syria, 146 years before Christ, which was said to be as large as the sun. Another appeared at the birth of Mithridates, which, according to the awestruck chroniclers of that age, emitted more light than the sun and embraced the whole heavens .-But these accounts are evidently fabulous. The following remarkable cases, in the opinion

of the present eminent French Astronomer Royal, Arago, are well attested:

In the year 43 before Christ, a "hairy star' appeared which could be seen in daylight with the naked eye. It is hardly necessary to add that the superstitious Romans considered this as the deification of the soul of Cæsar, who had been asassinated a short time previously.

In the year 1802 after Christ, two comets of great brilliancy appeared. One of them was so bright that the nucleus, and even the tail, could be seen at mid-day in March; the other could be seen before sun set.

Cardan relates that in 1532, the curiosity of the inhabitants of Milan was greatly excited by "a star which could be seen at mid-day." Venus not being in a position to be seen at the time, the star of Cardan is believed to have been a comet.

"The beautiful comet of 1577 was discovered." says Arago, "on the 13th day of November, by Tycho Brahe before sun set."

We have before aliuded to the great comet of 1774. On the 1st of February this, according to the Astronomer Chezeaux, was more conspicuous than Sirius, the brightest of the stars; on the 8th it equaled Jupiter; a few days after, it was only equaled by Venus. On the 1st of March it was visible to the naked eye for several hours about

The present comet, on supposition that the testimonies which have reached us should prove good, will rank among the most extraordinary ever seen. It is no doubt moving with great rapidity. Should the evenings be cloudy for a week to come we may possibly not see it again.

Time was when the appearance of so strange a visitor, flaming through the firmament, spread universal terror and consternation. That time, we hope has, in a great measure, passed away to return no more. But the world is evidently not yet fully purged of the old leaven of ignorance and superstition. There would seem to be some among us who are incorrigibly bent upon making reason and common sense subordinate to the most childish fears, and the most whimsical and proposterous fancies. Predicted martyrdom at the tail of a comet would scarce surpass their credulity .-Whether there is any cure for such ignorance and fears we know not. It may be well, however, for such to consider that comets are a part of the creation which God made. They pursue their respective and appointed courses with as much order and harmony, in respect to the great laws of planetary motion, as do the members of our own little system. They are, so to say, messengers, from one system to snother; and come back to us from the long travel of a thousand years, to announce to us

that harmony and order pervade the universe. Comets are not so rare as may at first be supposed. From 1802 to 1831, no less than 43 were seen, In 1826 five comets were seen, and all new ones. The probability is that about three new comets will be seen every two years.

A remark or two we intended to make upon the probability of the Earth's being some time or other destroyed by the collision of a comet. It is sufficient perhaps to say, that the possibility of such collision is admitted. The probability of it has been computed with great care. The result is given by Arago. It may possibly minister some consolation to those who dread such a catastropke to be informed that the Earth minds her own business and gives to all idle wanderers an immensely wide berth. The chances of escape are 231,000, 000 to 1 of collision.

The effect, moreover, of such collision might se very disastrous; but the real probability is that he Earth would bear off in the upper regions of her atmosphere the diffused matter of many comets without in the least disturbing the composure of us poor mortals in these nether parts.

We cannot but hope, therefore, that this interesting visitor will remain with us long enough to fairly make the acquaistance, and leave us to carry to other and distant portions of the universe the same welcome intelligence which it brings to us, that law, order, and harmony reign through boundless space. Brown University, March. 9th, 1843.

Lectures on Geology. D' Doctor Lyell's Lectures on Geology .- The econd edition of these celebrated Lectures as reported for The Tribune is now ready. It contains an Engraved Frontispiece exhibiting an ideal section of part of the Earth's crust, with explanations. It will also contain a general Inreduction to Geology not before published. LECTURE ! embraces the following subjects: Auvergne, Lacustrine Period, Volcanic Period, Eruption of Coseguina, Mount Dor. LECTURE II. The Earth's Strata, Marine Strata, Perinds, Auvergne District, Sub Appenines, Mount Ætna .-LECTURE III. Upheaval and Subsidence of the Earth, Na ples, Temple of Serapis, Monte Nuovo. LECTURE IV. Coral Reefs. Coral Islands. LECTURE V. Origin of Coal. Lec-TURE VI. Fossil Foot-prints. LECTURE VII. Recession of the Falls of Niagara. LECTURE VIII. Boulders and Ice

To the above is also added in this edition, a Sketch of the Lecture of Dr. J. AUGUSTINE SMITH, delivered before the Lyceum of Natural History on the 9th of December last on the Different Ruces of Men.

Price per single copies 25 cents. Postmasters remiting One Dollar will be entitled to five copies.

GREELEY & MCELRATH. Tribune Buildings, New York.

Dr. Lardner's Lectures.-The numerous orders received for this popular work within the last month have rendered it necessary to put another edition to press, which will be published in the course of a few days. This edition will be introduced by a SKETCH OF THE PROGRESS OF PHYSICAL SCIENCE, by THOMAS THOMSON, M. D., F R. S., L. & E., &c. &c., Regius Professor of Chemistry in the University of Glasgow. This splendid work, which is as elegantly written as it is lucidly arranged, embraces the following subjects. INTRO-DUCTORY REMARKS-MATHEMATICS-Arithmetic, Geomemore exactly 1207 days. This was last seen the try, Algebra-Of Observation and Experiment-Mechanics -Astronomy-Optics-Hydrostatics &c-Electricity-Magnetism-Chemistry-Giving a Historical Sketch and General Summary of the Principles of each of the foregoing branches of Science. Price for the whole, including Larder's Lectures, 25 cents per single copy. Postmasters and others will receive five copies for \$1

> American Family Magazine. IT The Cheapest Work ever published in the United States .- The first part of the American Family Magazine or General Abstract of Useful Knowedge, a work eminently useful in families, and calculated to arrest the attention, awaken the curiosity, and enlighten the understandings of the young. Illustrated with 5000 Engravings. To be completed in 16 Numbers of 208 to 240 pages each. The first No. contains 208 pages, royal octavo, and 200 Engravings and is sold at 25 cents!

> The above work may be obtained at the office of THE PRIBUNE. In Philadelphia, from Burgess & Zeiber; Bosn. Redding & Co.

TT No. 2 is now ready. GREELEY & McELRATH, Tribune Buildings.

Important Work.

THE IMPROVEMENTS IN AGRICULTURE, ARTS, &C. of the United States, as set forth luminously and at length in the recent Report of Hon. W. H. ELLSWORTH Commissioner of Patents, will speedily be published at the office of the New York Tribane, in a neat and convenient Book, of near 100 pages, with double columns. It is one of the most valuable and instructive Public Documents ever published and should be in the hands of every man in the

The publishers of the above have concluded to add the following valuable Treatise without additional charge. ON RAISING SWINE, and the best METHODS OF FATTENING PORK.

SANDS'S SARSAPARILLA.

Improvement in whatever regards the happiness and we fare of our race is constantly on the march to perfection, and with each succeeding day some new problem is solved, or some profound secret revealed, baving an important and direct bearing over man's highest destintes. If we take a retrospective view over the past twenty years, how is the mind struck with wonder! What rapid strides has science made in every department of civilized life! particularly in that which relates to the knowledge of the human system in health and disease. How valuable and indispensable are the curative means recently discovered through the agency of chemistry! How does the imagination kindle and our admiration glow at the ingenuity, the near approach to the standard of perfection, of the present time! Through the elaborate lavestigations of ! hysiology, or the science of Lirz, and the Pathology of prevalent diseases, much valuable practical knowledge has been gained. In consequence of becoming acquainted with the organization, the elements of the various tissues and structures of the system, remedies have been sought after and discovered exactly adapted to combine with, neutralize and expel morbific matter, the cause of disease, and substitute healthy action in its place. The beautiful simplicity of this mode of treatment is not only suggested by the pathology of diseases, not only grateful to the sufferer, but perfectly in consonance with the oper ations of Nature, and satisfactory to the views and reasonings of every intelligent, reflecting mind. It is thus that Sands's Sarsaparilla, a scientific combination of essential principles of the most valuable vegetable substances, operates upon the system. The Sarsaparilla is combined with the most effectual aids, the most salutary productions, the most potent simples of the vegetable kingdom; and its unprece dented success in the restoration to health of those who had long pined under the most distressing chronic maiadies, has giver it an exalted character, furnishing as it does evidence of its own intrinsic value, and recommending it to the afflicted in terms the afflicted only can know. It has long been a most important desideratum in the practice of medicine to obtain a remedy similar to this-one that would act on the liver, stomach and bowels with all the precision and petency of mineral preparations, yet without any of their deleterious effects upon the vital powers of the system The attention of the reader is respectfully called to the following certificates. However great achievements have heretoore been made by the use of this invaluable medicine, yet daily experience shows results still more remarkable. The proprietors here avail themselves of the opportunity of saying it is a source of constant satisfaction that they are made the means of relieving such an amount of suffering.

Newark, N. J. Dec. 13, 1842,

Messrs. Sands: Gent-Words cannot express the grat

Messrs. Sands: Gent—words cannot express the grait unde I feel for your treatment to me, a stranger suffering under one of the most loathsome diseases that na ure is capable of bearing. The disease with which I was afflicted commenced with indammation of the eyes, in the year 1856, which caused almost total blindness. For this I was treated and finally relieved, but the remedies were such as to cause the development of a scrattlings affection on my left arm the development of a scrotulous affection on my left arm ar the elbow. "The pain extended from the shoulder to the end of my

ription, I tried various remedies and consulted different Physicians in New-York and amongst them the late Dr. Bushe, who told me the disease of the arm was caused by the large quantity of mercury taken to sure the inflammation of my news.

My sufferings continued, the arm enlarged, tumours My sufferings continued, the arm enarged, turbolist formed in different places, and in a few months discharged making ten running places at one time, some above and some below the elbow, and the discharge was so offensive that no person could bear to be in the room where I was.— I then applied to another distinguished Physician who told I then applied to another distinguished Physician who told me amputation of the arm was the only thing that could save my life, as it was impossible to cure so dreadful a disease; but as I was unwilling to consent to it he recommended me to use Swaim's Panacea freely, which I did without deriving but little benefit. "For three years I was unable to raise my hand to my head or comb my hair, and the scrofula now made its appearance on my head, destroying the bone it different places, causing extensive ulcerations and I feared it might reach and destroy the brain—the head swelled very much, accompanied with violent pain, numerous externa I much, accompanied with violent pain, numerous external remedies were recommended, but they did no good.—About a year since I was taken severely ill with a swelling of the body from nead to foot, so that I was entirely helpless, the Doctor advised me to go to the Hospital, for he did not understand my case; for the last few months I had beet afflicted with a severe pain in both sides, at times so hard I could scarcery get my breath. A backing cough constantly annoyed me, and this combined with my other mainties rendered me truly miserable. Such, gentlemen, had been much, accompanied with violent pain, numerous externa my situation for seven years of my life when I commenced the use of your Sarsapa illa, but as my case was considered the use of your Sarsapai int, but as my case was considered hopeless, and the near prospect of a speedy dissolution seemed inevitable, I felt but little ensouragement to persevere. The persuasion of friends induced one to try your medicine, which in a few days produced a great change in my system generally, by causing an appetite, relieving the and giving me strength; as success inspires confid pains, and giving me strength; as success inspires confid-ence, I was encouraged to persevere, my pains grew easier my strength returned, food relished, the ulcers healed, new flesh formed, and I once more felt within me that I might get well. I have now used the Sarsaparilia about two get well. I have now used the Sarsaparina about two
months and am like a different being. The arm that was to
be an putated has entirely healed, a thing that seemed impossible. I can scarcely believe the evidence of my owe
eyes, but such is the fact; and it is now as useful as at any
period of my life, and my general health is better than it
basbeen for years past.

Health; what magic in the word! how many thousands
have sought it in arreign lands and sunny climes, and have

have sought it in oreign lands and sunny climes, and have sought it vain! Yet it came to me when I had given up to die, and as I feel the pulsations of heatth coursing through my veins, my whole heart and soul go forth in fervent gratitude to the author of all our sure mercies, that he has been graciously pleased to bless the mercies, that he use of "Truly have you proved yourself the good Samaritan to the afflicted, for next to my Creator my life histolyted to the formula." samaritan the since of the use of your invalvable Sarsa-parilla. The value of such a medicine is countless beyond price, money cannot pay for it. I have been raised from death, I may say, for my friends and myself thought it impossible I could recover. And now gentlemen safter me to add another proof certified too by my friends and guardians as a just acknowledgement of the virtues of your health restoring Sarsaparilla. That the afflicted may also use it and enjoy the benefits it alone can confer, is the heartfelt, fervent

enjoy the benefits it alone can co wish of their and your friend. MARTHA CONLIN. I know Martha Conlin and believe what she states in this locument to be perfectly true. JOHN POWER, document to be perfectly true.

JOHN POWER,
VICAR GENERAL OF NEW-YORK,
Rector of St. Peter's Church.

Given at New York this 14th day of December, 1842.

I know Martha Conlin, and have known of her suffering lliness. †JOHN DUBOIS, Bishop of New-York. I place full confidence in the statement made by Martha

Conlin, having known her the past twesty years. I will cheerfully give any particulars in relation to her case to these who may wish further information.

Sr. ELEZABETH. Superior of the Roman Catholic Orphan Asylum, Prince Dec. 14, 1842.

1 have confidence in the representations made by Martha Conlin, and have full knowledge of her case.

ELIJAH F. PURDY,
Alderman 10th Ward of the City of New-York.

Martha Conlin has lived in my family the last 13 years and I hereby certify the foregoing statement made by her-self is correct.

Mrs. MARY B. LLOYD, No. 604 Broad st. Newark, N. J.

Sands's Sarsaparilla will also remove and permanently cure diseases having their origin in an impure state of the blood and deprayed condition of the general constitution, viz: Scrofula or King's Evil, in its various forms; Rheumatism, obstinate cutaneous Eruptions, Blotches, Biles, Pimples or Pusiules on the face, chronic Sore Eyes, Ringworm or Tetter, Scald Head, enlargement and pain of the bones and joints, stubborn Ulcers, syphilitic symptoms, diseases arising from an injudicious use of Mercury, female derange-

ments, and other similar complaints.

Prepared and sold at wholesale and retail, and for exportation, by A. B. Sands & Co. No. 273 Broadway, (Granite Buildings.) corner of Chambers street, New York. Also sold by A. B. & D. Those for 6 inch pipes will be 5 feet deep and 2 feet wide

at battom.

Those for 12 inch pipes, will be 51 feet deep and 21 feet wide at bottom. That for 18 inch pipes will be 7 feet deep and 34 feet wide

at bottom.

That for 24 inch pipes will be 7 feet deep and 4 feet wide t bottom. That for 30 inch pipes will be $7\frac{1}{2}$ feet deep and $4\frac{1}{2}$ feet wide After the pipes have been laid, (which will be done by

at bottom.

After the pipes have been laid, (which will be done by agents employed by the Croton Aqueduct Committee,) the trenches will be filled in, in laversnet exceeding 9 inches in thickness, by the Contractor, with sound and good materials for the purpose, the same to be well rammed, and then repayed in a durable and workmanlike manner.

Offset trenches will be required occasionally when branches are to be laid. Where hydrants are to be placed, cross trenches 5 feet deep and 1½ ft. wide at bottom, will be required. After the same are placed, the streets and sidewalks to be repayed, and left in like good condition, as before the commencement of the werk.

Proposals will state the price per mile for the trenches for 6 and 12 inch pipes, to cover all expenses for excavating, back-filling, ramming, repairing, supplying sand, paying stone, and clearing the streets of all soperfluous materials and a price per cubic yard for the tresches, for 20, 24 and 30 inch pipes, to cover all expenses for excavating, back-filling and ramming, and a price per square yard for the repaying, supplying sand, paying stones, and cleaning the streets of all superfluous materials. A price per foot, running measure, will also be named for the hydranttrenches, measuring from the longitudinal main to the foot of the hydrant.

In deciding upon the proposals, the Croton Aqueduct Committee will reserve the right of rejecting any proposals they disapprove.

Committee will reserve the right of rejecting any proposate they disapprove.

Each proposal must be accompanied with the signatures of two respossible persons, signifying their assent to become sureties for the faithful performance of the contract; to be marked on the outside 'Proposals for excavating trenches,' and to be addressed to the subscriber.

It will be stipulated in the contract that the contractors see that such lamps as are furnished and directed to be placed at trenches left open during the night, are supptied with oil and placed every night in consplcuous positions.

il, and placed every night in conspicuous position The attention of Contractors is requested particularly to the following: The term excavation is to be understood as embracing all excavation, other than that of Rock measuring half a contractor, and order than that of Rock measuring ball a cubic yard, and over, and contractors will be sup-posed to have informed themselves of the character of the excavation, and made their proposals accordingly. The contractor will be required to keep the trenches clear until he pipes are laid and caulked, and no allowance will be

The street is not to be broken up without written direc-The street is not to be broken up without writen offec-tions from the subscriber; which directions will specify from, and to what points, the street is to be broken up from time to time. It is istended that the trenches shall be opened no faster than the pipe layers can put in the pipes, and the trenches are to be rehilled and repayed immediately after the pipes are laid.

payments on estimates will be within ten per cent, of work done, on the completion of the work such sum will be rere-ved for two months, as will in the opinion of the Engineer provide for any repaving, or other work found neces sary, in consequence of the imperfect manner in which any sary, in consequence of the imperiod the Contractor, part of the work has been done on the part of the Contractor. No contract will be finally settled without the personal examination and certificate of the Engineer of the Croton

Aqueduct Works.

Copies of the contract, and certificate in final settlement, can be examined at the Office of the Croton Aqueduct Works.

By order of the Croton Aqueduct Committee.

EMARKABLE CURE OF CONSUMPTION in Philadelphia, by "SCHENCK'S
PULMONIC SYRUP."

1. Charlotte Carter, residence No 114 North Fourth st.
above Race, do hereby certify, that about three years since
I took a severe cold which settled on my right side, and
darting to my shoulders, which grew werse and worse. I
soon became very much oppressed—great difficulty of
breathing, violent cough, and could not expectorate. Ibecame very weak, costive, and fever in the alternoon.
Part of the time I had night-sweats, and in fact myself
and friends thought I was past recovery. I tried several
physicians and a number of pulmonary remedies, but could
get no relief. Last spring I was recommended to try
Schenck's Pulmonic Syrup. I took two bottles and found
but little relief, and had concluded to abandon it, but
through the solicitation of my children I was induced to
make a farther trial, and I am happy to say that while I was through the solicitation of my children I was induced to make a farther trial, and I am happy to say that while I was using the third bottle the pilegm started, and when my cough came on I could expectorate very freely. My cough, oppression, heetic fever, and all my unfavorably symptoms vanished. I now enjoy good health for a person of my are, and I feel satisfied that the Pulmonic Syrup has saved my life. I am will raining strength and impraying in general

life. I am still gaining strength and improving in general It would afford me much pleasure to state more particu-

larly my former situation and the present, and the benefit I have received from Schenck's Palmonic Syrup to any person who will call on me at my residence, No. 114 North Fourth street, who is afflicted with that heretofore considered fatal disease Consumption.

CHARLOTTE CARTER

Wife of the late Wm. Carter.
Philadelphia, October 1, 1842. AND YET ANOTHER CURE IN PHILADELPHIA. The subscriber hereby certifies that he has been affected for several years with a dry, hacking cough, pain in the left breast, dizziness in the head, pain in the kidneys, attent areast, dizziness in the head, pain in the kidneys, at-tended with great difficulty in voiding urine, which would deposit a readish sediment, which gradually kept getting worse, until I was reduced to scarcely any thing else but skin and bone, and became very weak. I tried almost ev-ery remedy I could hear of, but could not find any relief. I heard of Schenck's Pulmonic Syrup and commenced using

ery remedy I could hear of, but could not find any relief. I heard of Schenck's Pulmonic Syrup and commenced using it. After using it a short time I began to get better. The Syrup produced a more powerful effect than any other remedy I had tried: it caused a copious flow of urine, which soon became natural in color and unattended with any pain. The pain in my back disappeared, the cough was relieved, until at length my system was entirely freed from disease. I have regained my flesh with astonishing rapidity, weighing now considerably more than I did before I commenced taking the syrup, and my chest is so completely purified taking the syrup, and my chest is so completely purified taking the syrup, and my chest is so completely purified from disease, and has expanded so much that I measure now two inches more around the chest than I did. I feel at this time perfectly well, and make this public statement to manifest the gratitude I feel toward Mr. Schenck for his value the diseasers which has been added. valuable discovery, which has been the means of restoring me to my health, and to advise the afflicted portion of the community to try the Pulmonic Syrup, believing that they will be benefitted by its use, and if they are not I am perfectly satisfied, on account of the purity of the medicine, they will receive no harm. Any person disposed to call on me at my residence, No. 29 Julianna street, above Vine, I will satisfy them, from my own case, that Mr. S. is justly entitled to be ranked as a great benefactor of mankind for hi valuable discovery. CHARLES BURK. Philadelphia, Feb. 25, 1843.

Offices exclusively for the sale of Schenck's Pulmonic Syrup, No. 49½ Courtland street, third door below Green-wich, and 146 Kace street, Philadelphia. Price one dollar per bottle or six bottles for five dollars. f28 2w. J. H. SCHENCK.

ONLY GIVE IT A FAIR TRIAL.—
We ask no more of any one than to give Dr. Jayne's
Expectorant a fair trial, and if it does not core the various eases for which it is recommended, sooner and more ef diseases for which it is recommended, some and note electually than any other medicine that has ever been offered to the public, the proprietor is willing to undergo any penalty, however severe, the nublic may see proper to impose upon him. It has, it will, and it can cure coughs, colds, asthma, brouchitis, bleeding from the lungs or throat, whooping cough, croup, and a very large majority of the most honeless cases of consumption, when physicians and most hopeless cases of consumption, when physicians and their prescriptions fail to do any good. Again we say, try it. It will not harm you, but must and will do you good.
It is prepared only by Dr. D. JAYNE, No. 20 South Third
street. Philadelphia, and Ne. 305 Broadway, New-York.
Price \$1 per bottle.

ORISON'S Hygeian Medicines.— NOTICE.—Whereas, A. A. Samanos, of 94 Broadway, New-York, is making an improper use of Messrs. Morison & Co.'s appointment for the sale of their Medi-cines. This is, therefore, to inform the public that Mr. Samanos is not authorized to sell 'MORISON'S PILLS' Samanos is not authorized to sent professors only Agents in New-York, and that Messrs. Morrisons' only Agents in New-York are Messrs. FIRTH & HALL, of No. 1 Franklin square, from whom alone the Medicines can be had gendine.

(Signed) MORISON & CO.

Dated British College of Health, New Road, Lendon, June 18th. 1842.

TS THERE NO BALM IN GILEAD? —Was the pathetic exclamation of the prophet of Israel as he beheld the degradation and miseries of his people and do s not the heart of the philanthropist move with emo-tions of commiseration and sorrow as he witnesses the hope-less and helpless condition of thousands dying all around him with Consumption, and other pulmonary affections, and to ask, "is there no balm that can heal them?" nor phy and to ask, states to bank that can deat them? and physician to rescue them from death? Yes, there is a balm that will heal thest, and at once arrest those fatal diseases and restore them to health. It is found in JAYNE'S EX-PECTORANT, which sever fails to relieve.

It is prepared by Dr. D. Jayne, 305 Broadway, New-York, and 28 South Third-street, Philadelphia. Price. \$1 per bottle.
